Supernature

Mockups for the iPad, landscape. Vermont Literacy Network student dashboard. October 13, 2026.

Fifteen screens, built from the art you sent. Purple cat-magic theme from her reference. Dashed boxes mark art still to upload (starter creatures, the beast model, the parts kit). Animated pieces (cauldron, kitty, book) show their first frame here. Every screen also has read-aloud, the Report bubble, Calm mode and reduced motion. Sounds, music and animation are listed in the plan (section 17).

1. 0. Home: the Witch's House
2. 1. Globe
3. 2. Encyclopedia in the animated book
4. 2b. Encyclopedia in the tabbed book
5. 8. Encyclopedia: Add a page
6. 9. Full-screen writing
7. 3. Creature Maker, one step at a time
8. 10. Name Builder (potions and creatures)
9. 4. Habitat (go outside through the door)
10. 11. Habitat: disaster signs and predictions
11. 12. Be the creature
12. 13. Generations (evolution, accurately)
13. 5. Cauldron and wand
14. 6. Word Part Book and Morpheme Mixer
15. 7. Creature cards and wands

0. Home: the Witch's House

Supernature opens here, and every screen has a Home button back to it (no top menu). Every object is a door: bookshelf, cauldron, beast model, globe, vending machine, witch table and window. Name tags always show. The Cat Wizard is the main host.

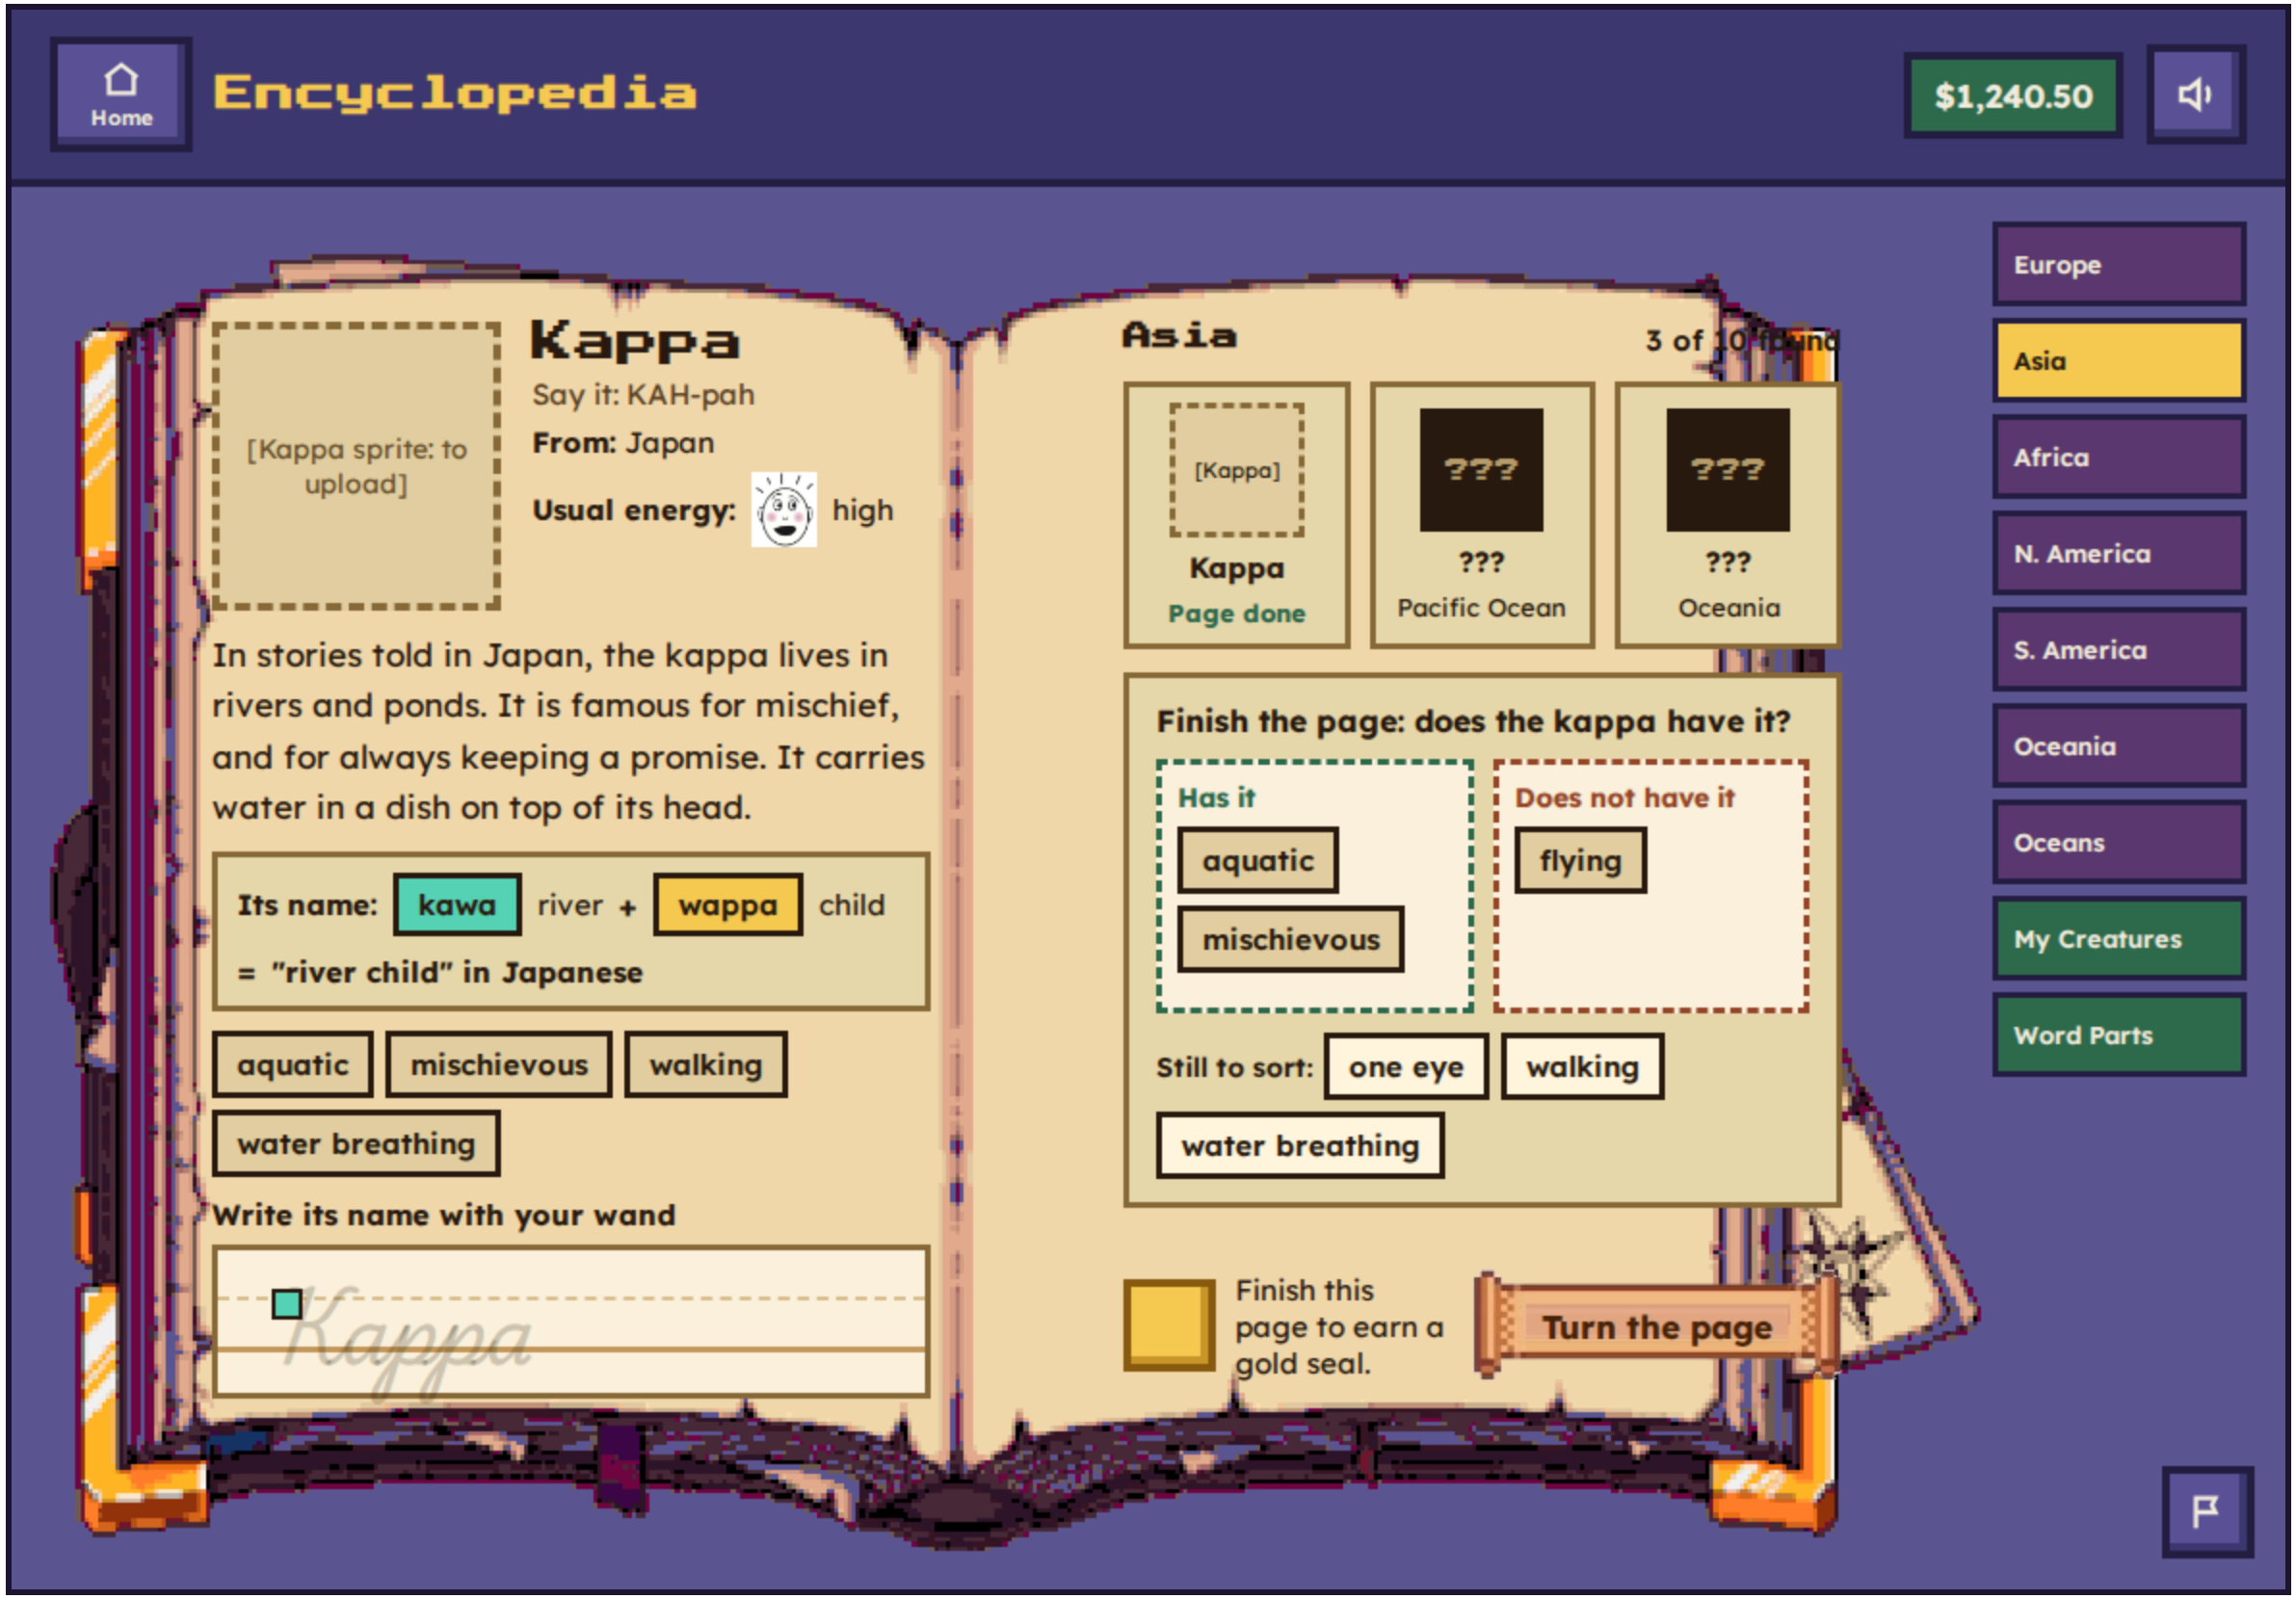

1. Globe

Spin and pinch the pixel globe. Asia lifts and glows when tapped. Each continent and ocean starts with one creature.

2. Encyclopedia in the animated book

A found creature page (Kappa) with word parts, energy, traits, cursive name line and the trait sorting job.

2b. Encyclopedia in the tabbed book

Flip pages with a swipe or arrows. ??? for creatures not found yet. Add a page for created creatures. Enlarge the writing strip.

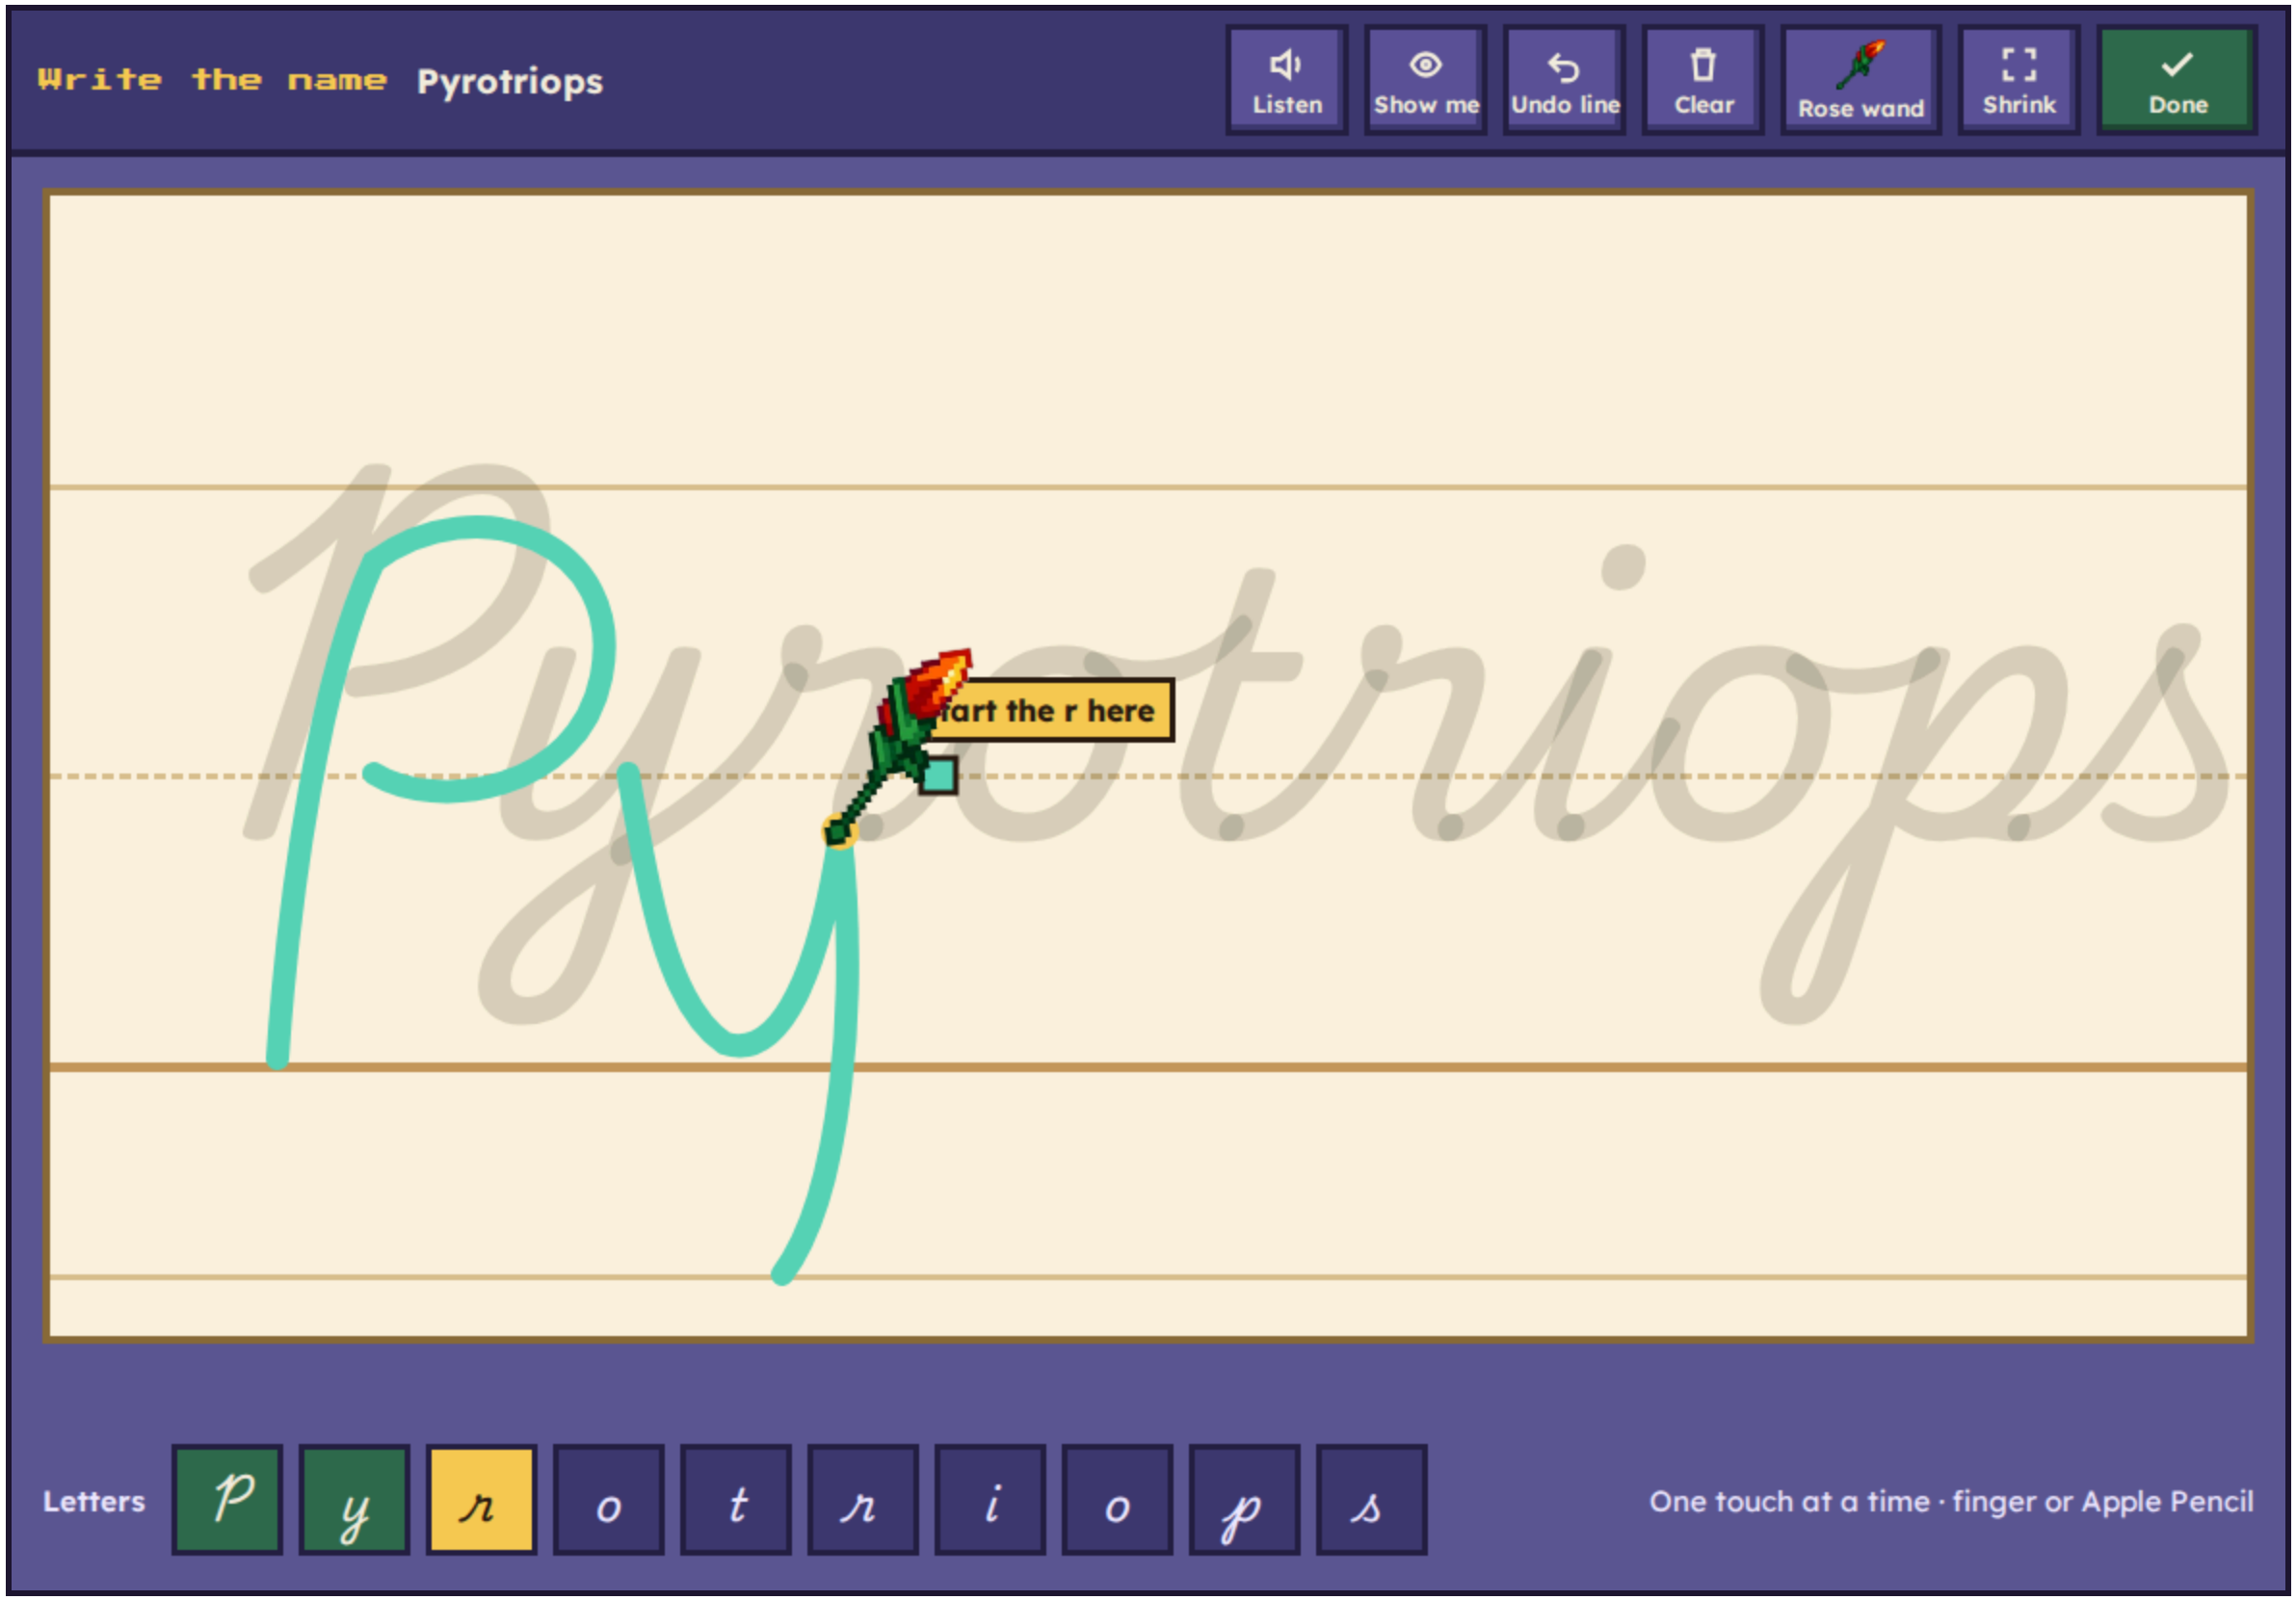

8. Encyclopedia: Add a page

A six-step form inside the book for a student's own creature, with a live page preview.

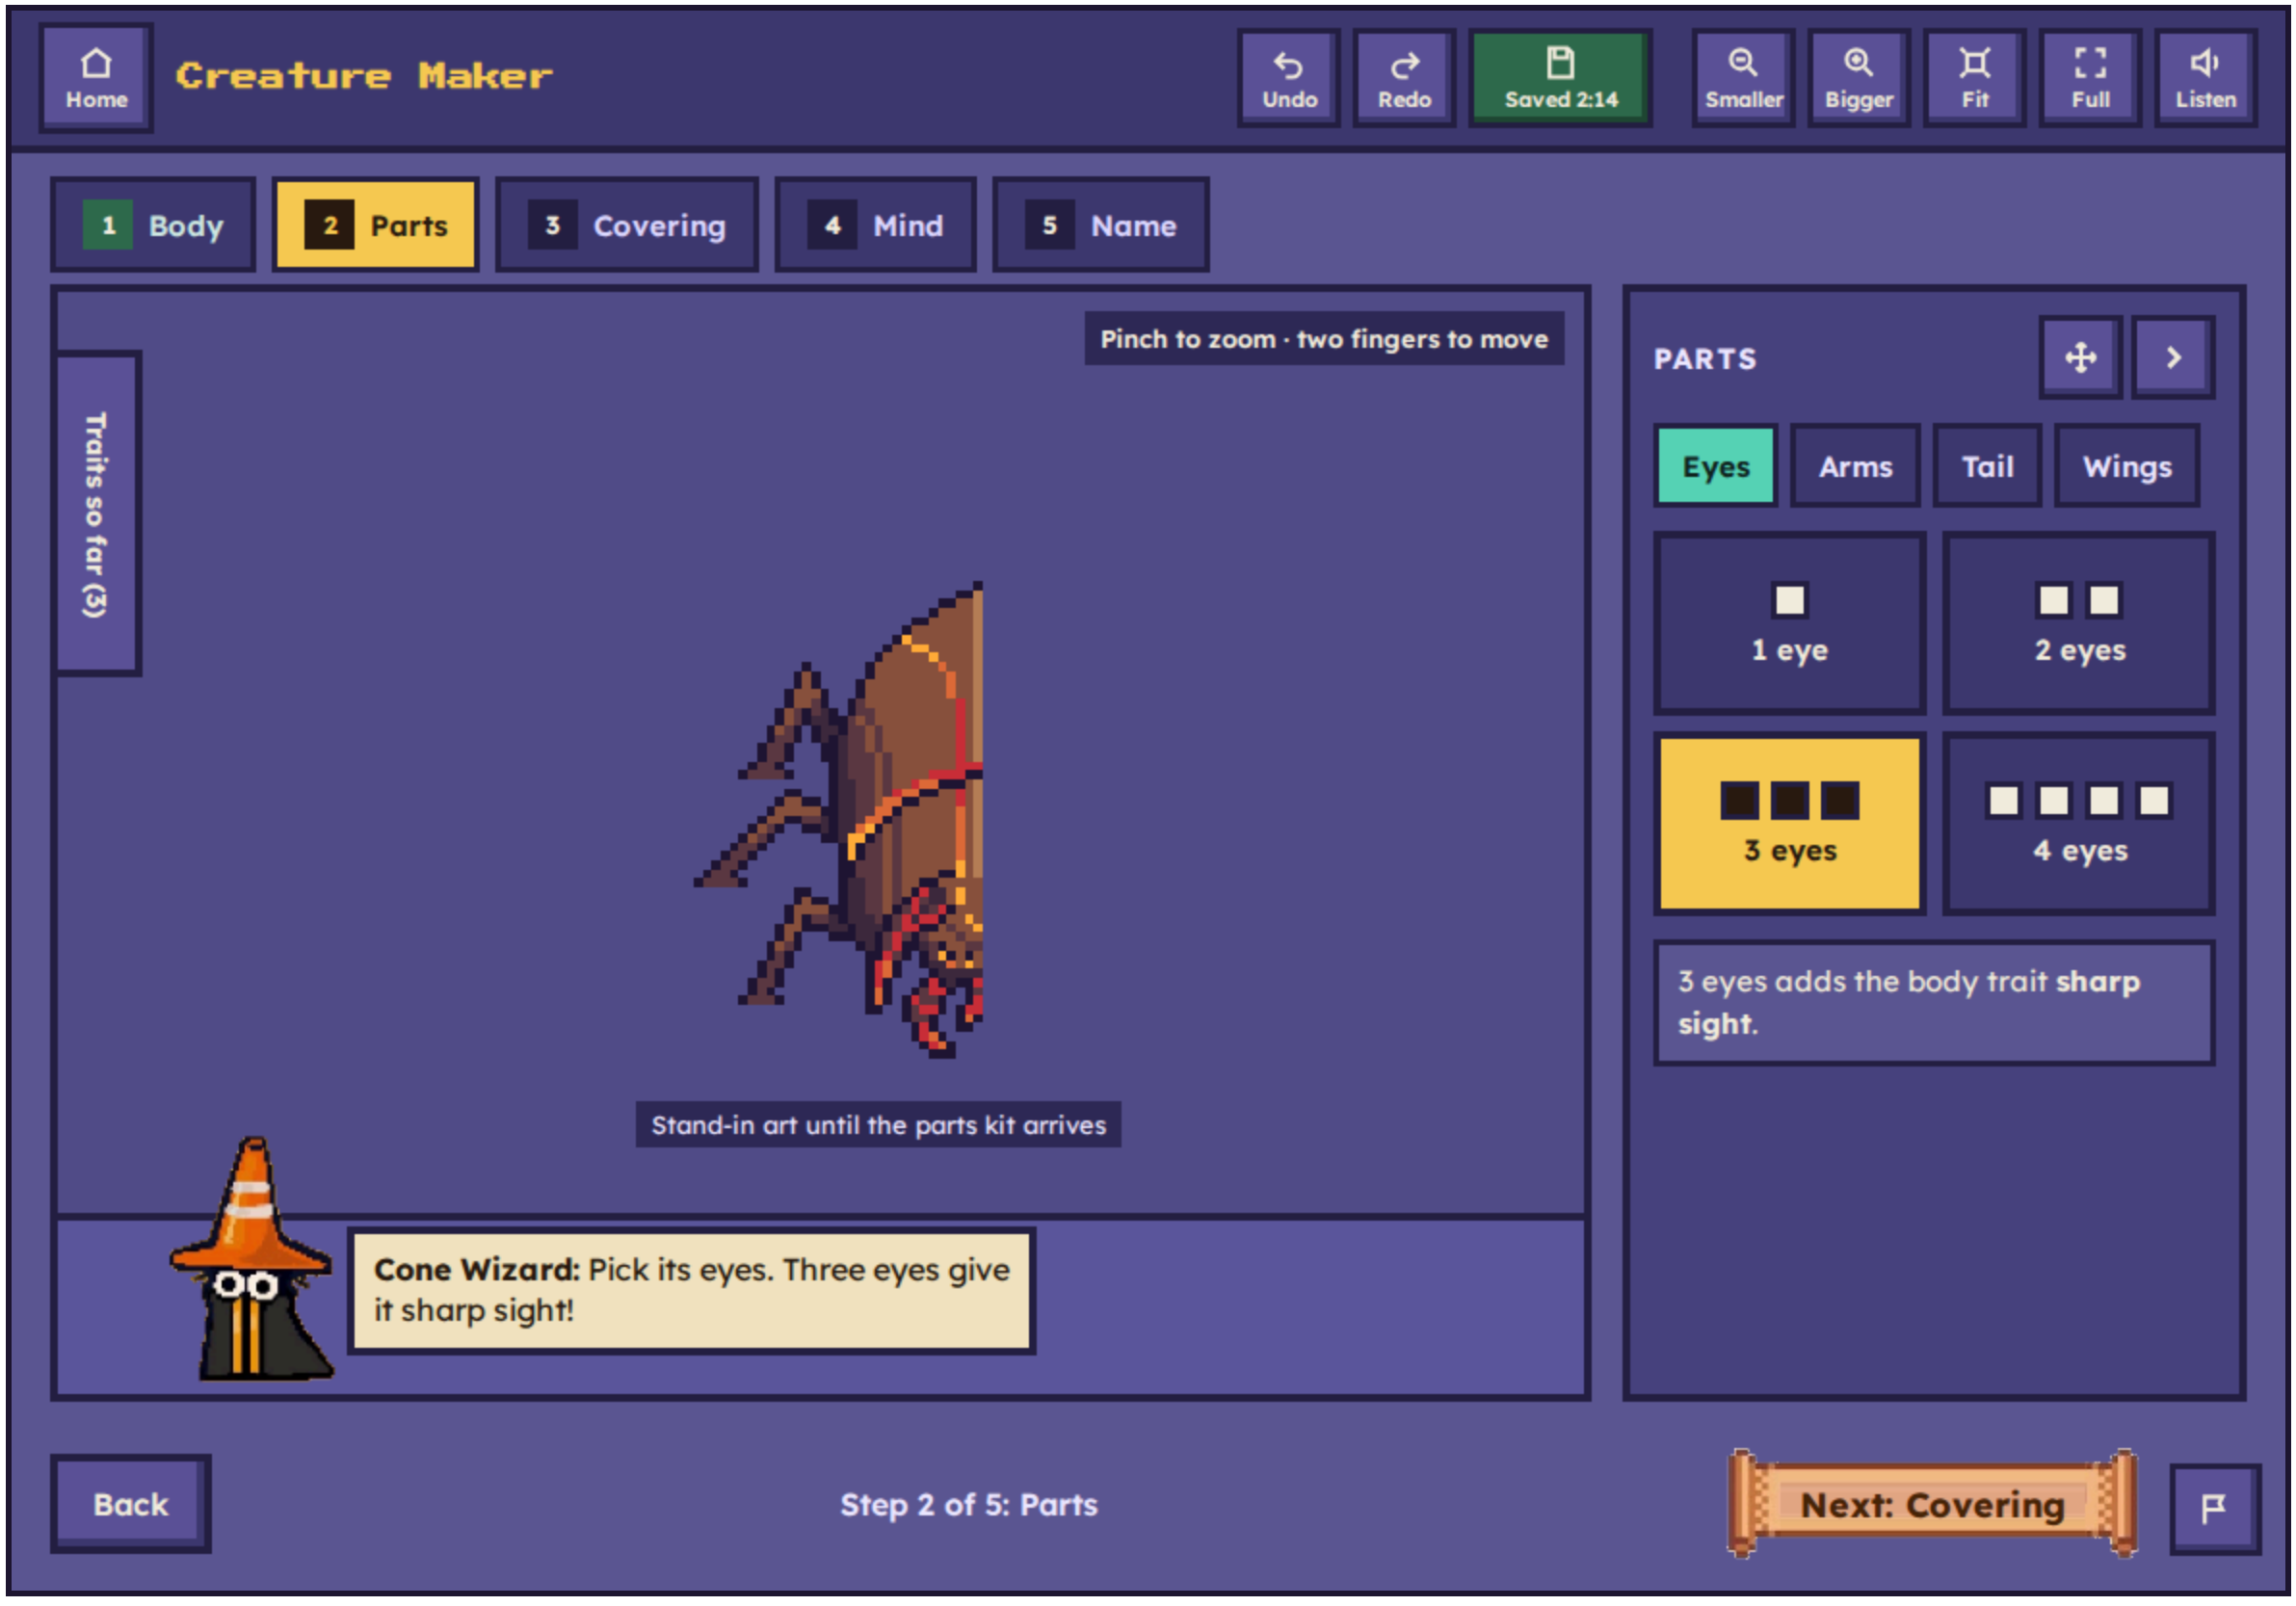

9. Full-screen writing

Every writing strip enlarges to this pad: big guide lines, start dots, the wand, Show me, Undo line, Clear and letter-by-letter checks.

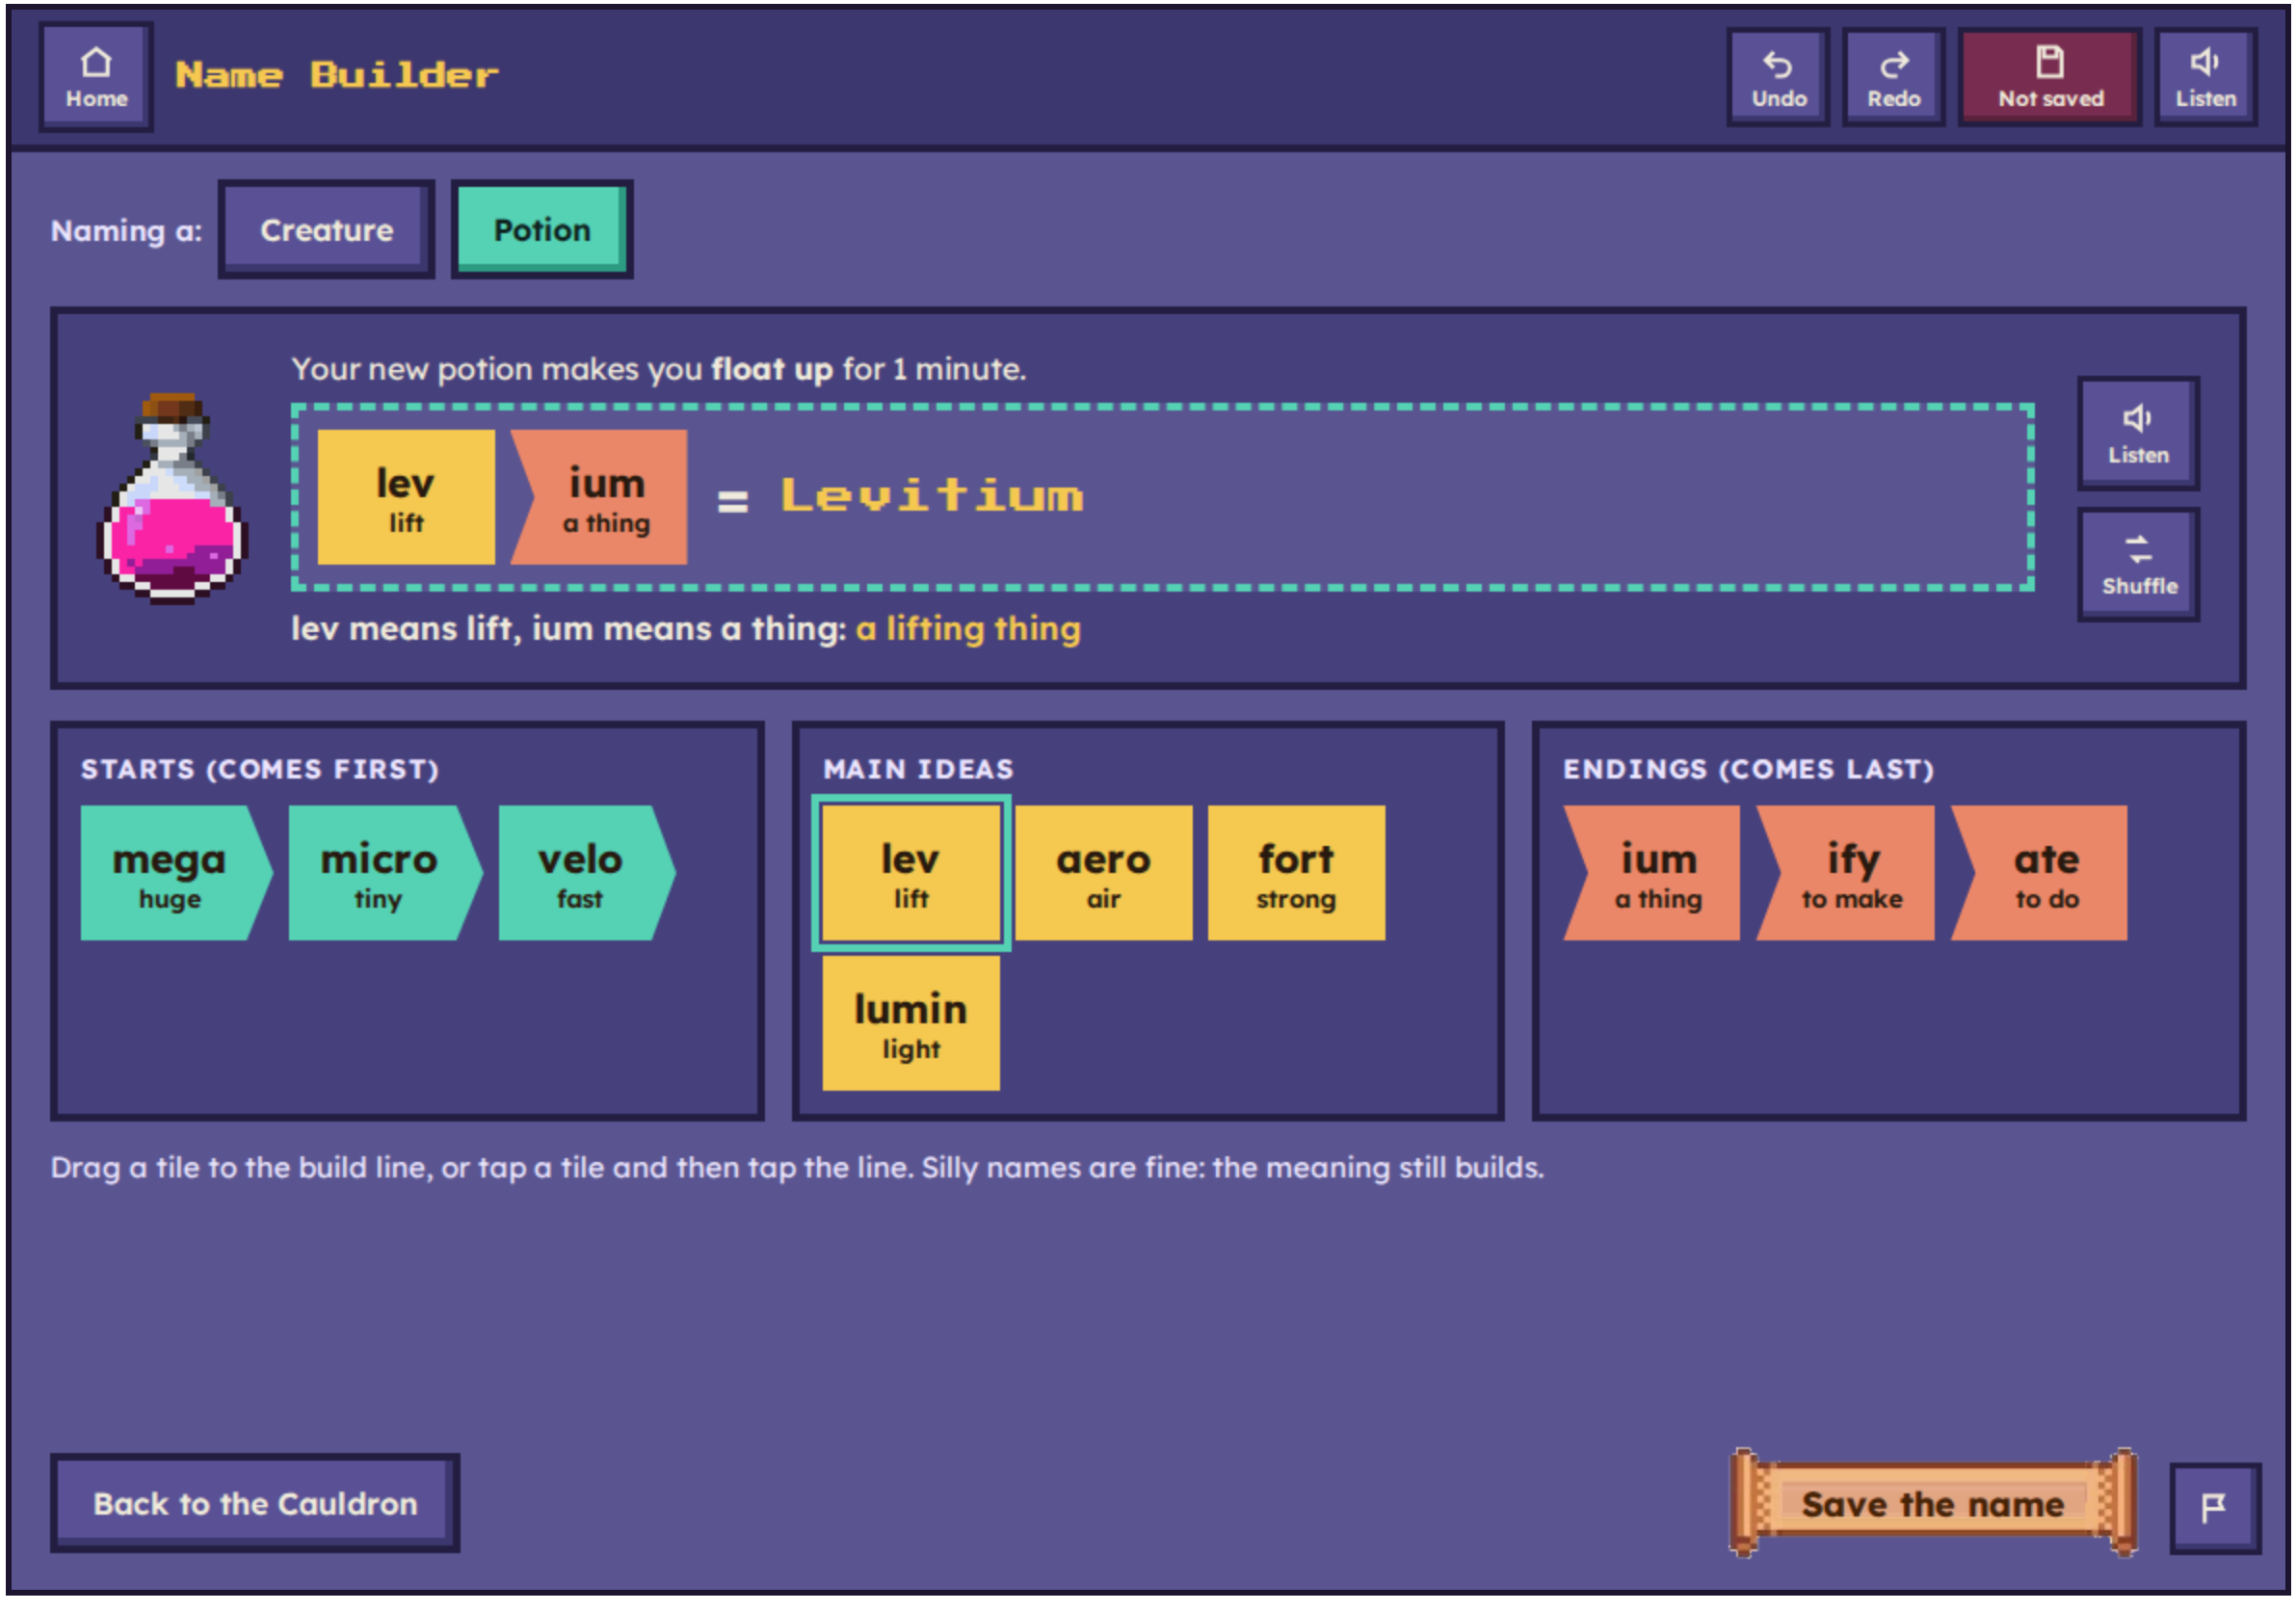

3. Creature Maker, one step at a time

Five steps with Back and Next. Only the current step's choices show. Panels collapse and move. Undo, Redo, Save, zoom and full screen on top.

10. Name Builder (potions and creatures)

Build names from word part tiles; the meaning builds as tiles snap in (lev + ium = Levitium, a lifting thing).

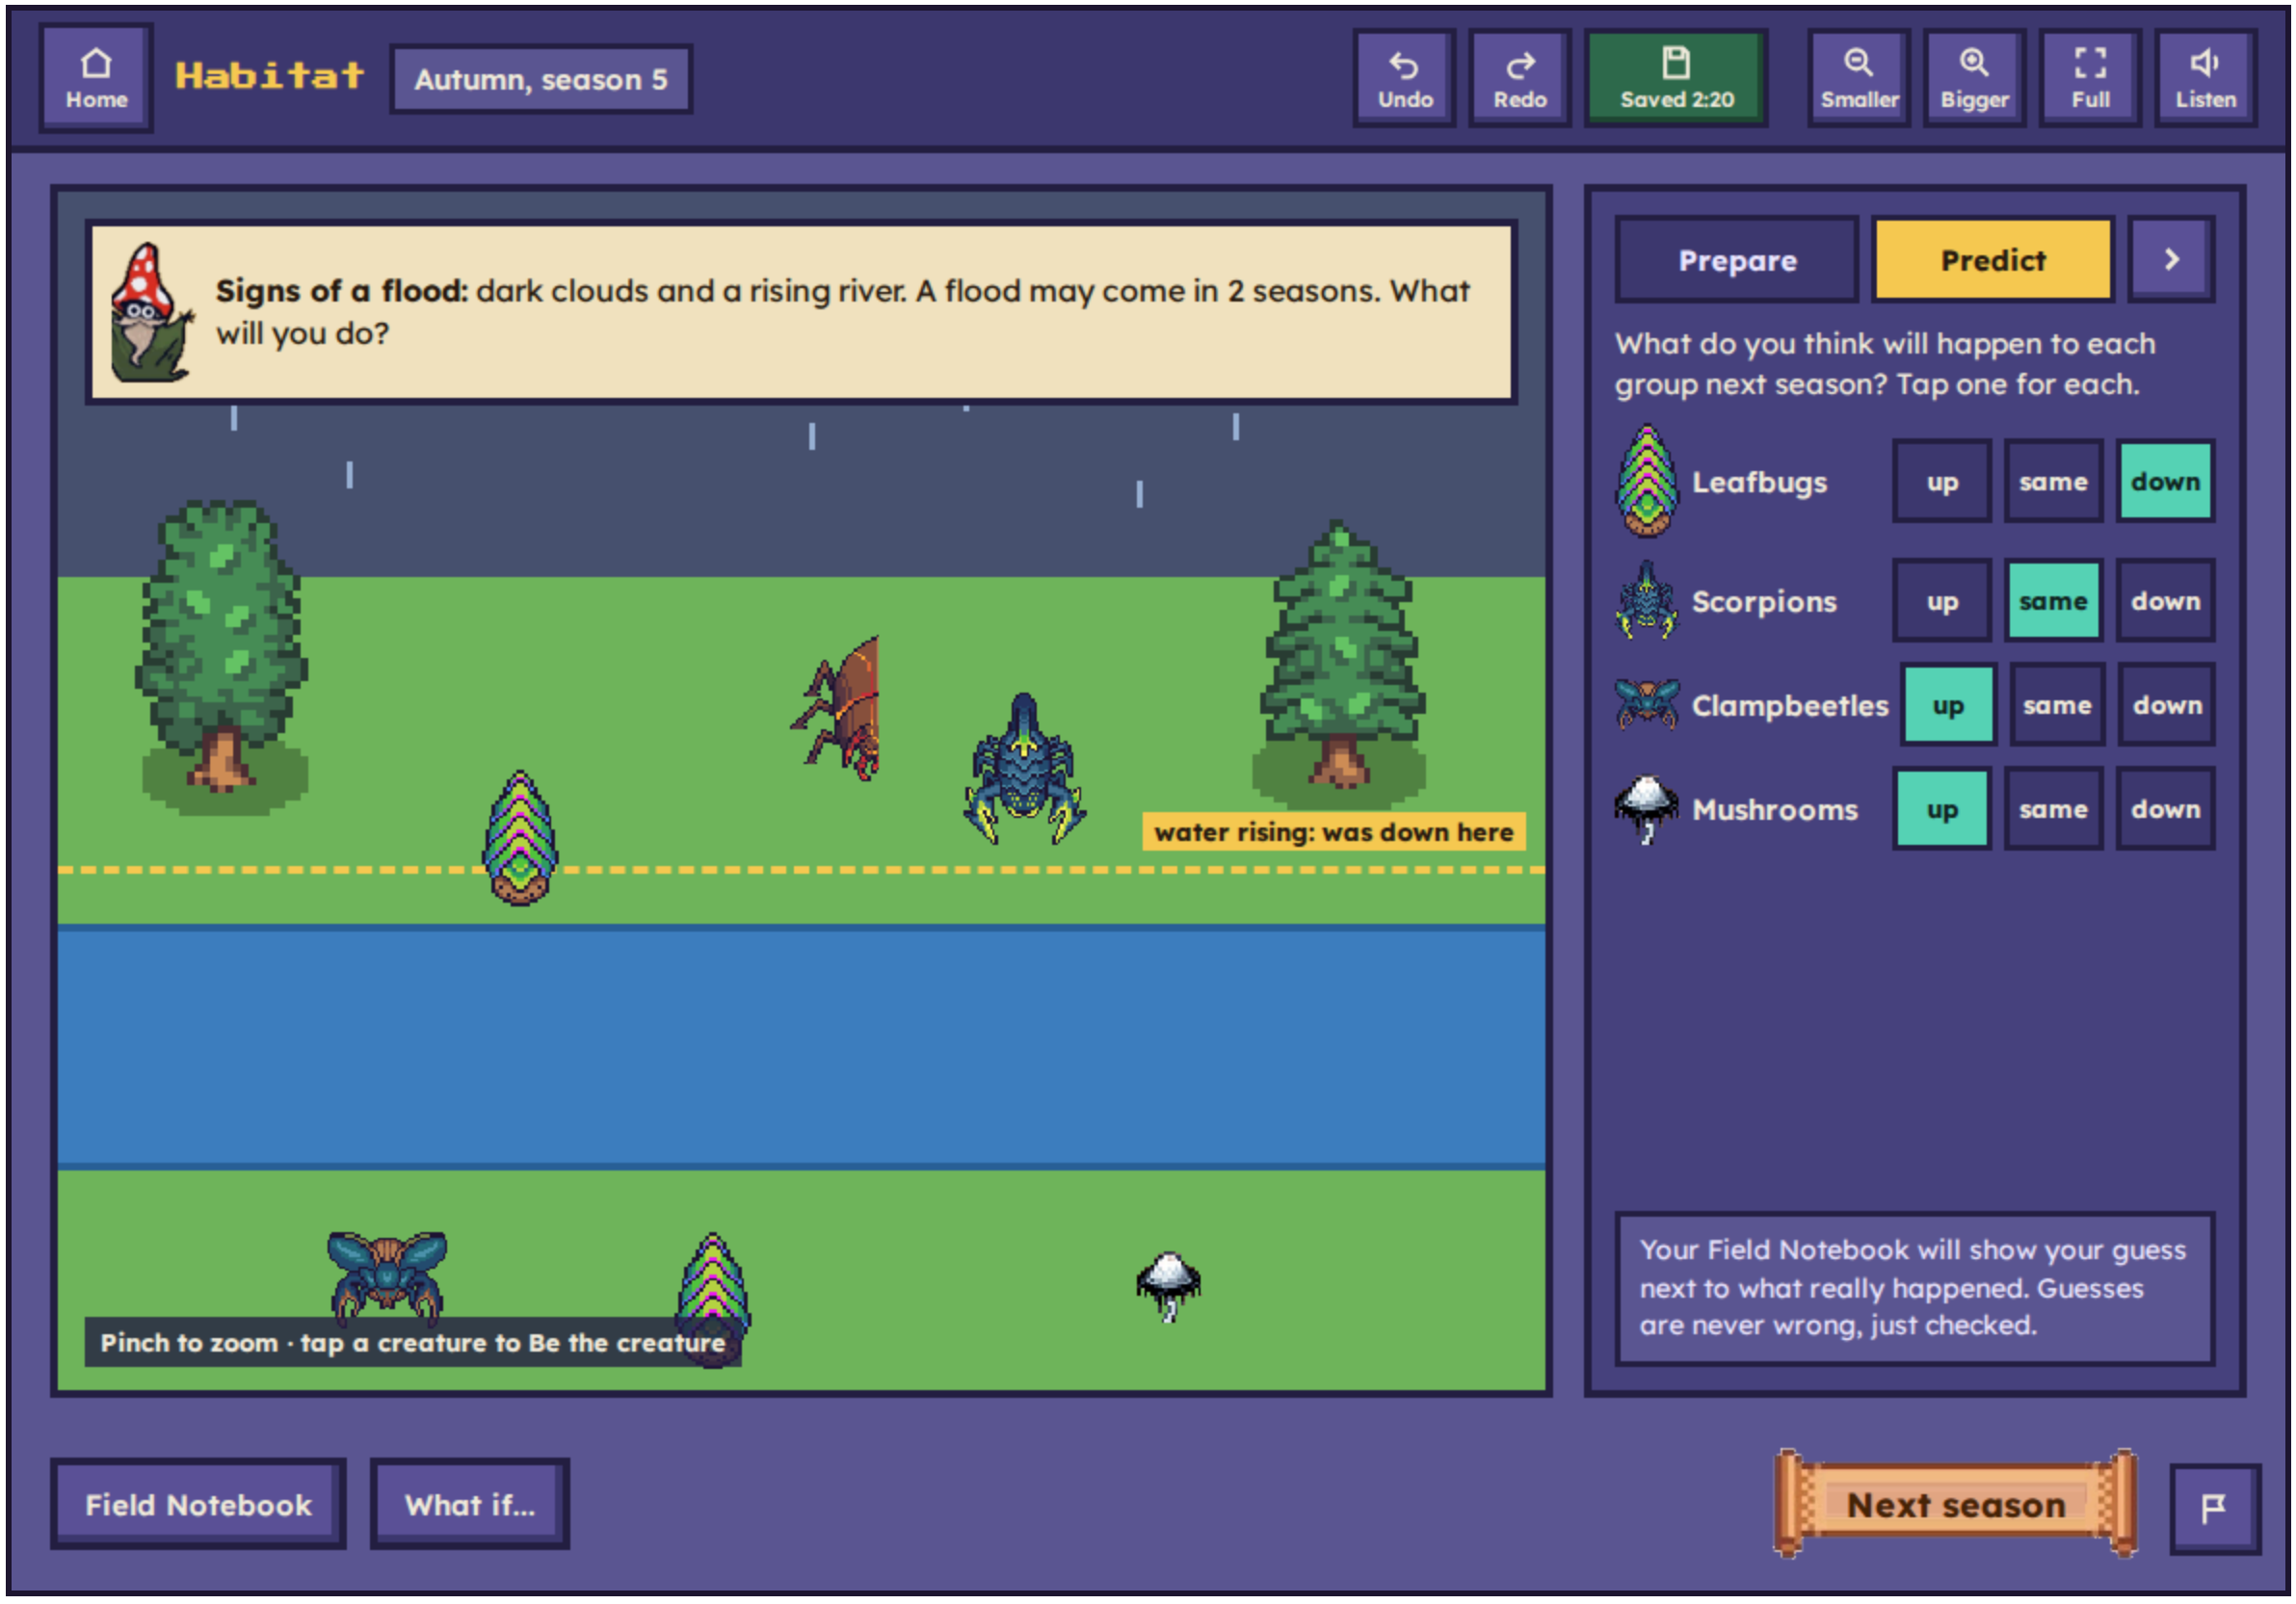

4. Habitat (go outside through the door)

The students' favorite. Creatures move slowly around the scene (walkers walk, fliers fly). Tap one for an Energy check-in or Be the creature. One helper panel at a time; food web and What if open on a button.

11. Habitat: disaster signs and predictions

Signs come first (dark clouds, rising river). Students prepare and predict up, same or down, then check in the Field Notebook.

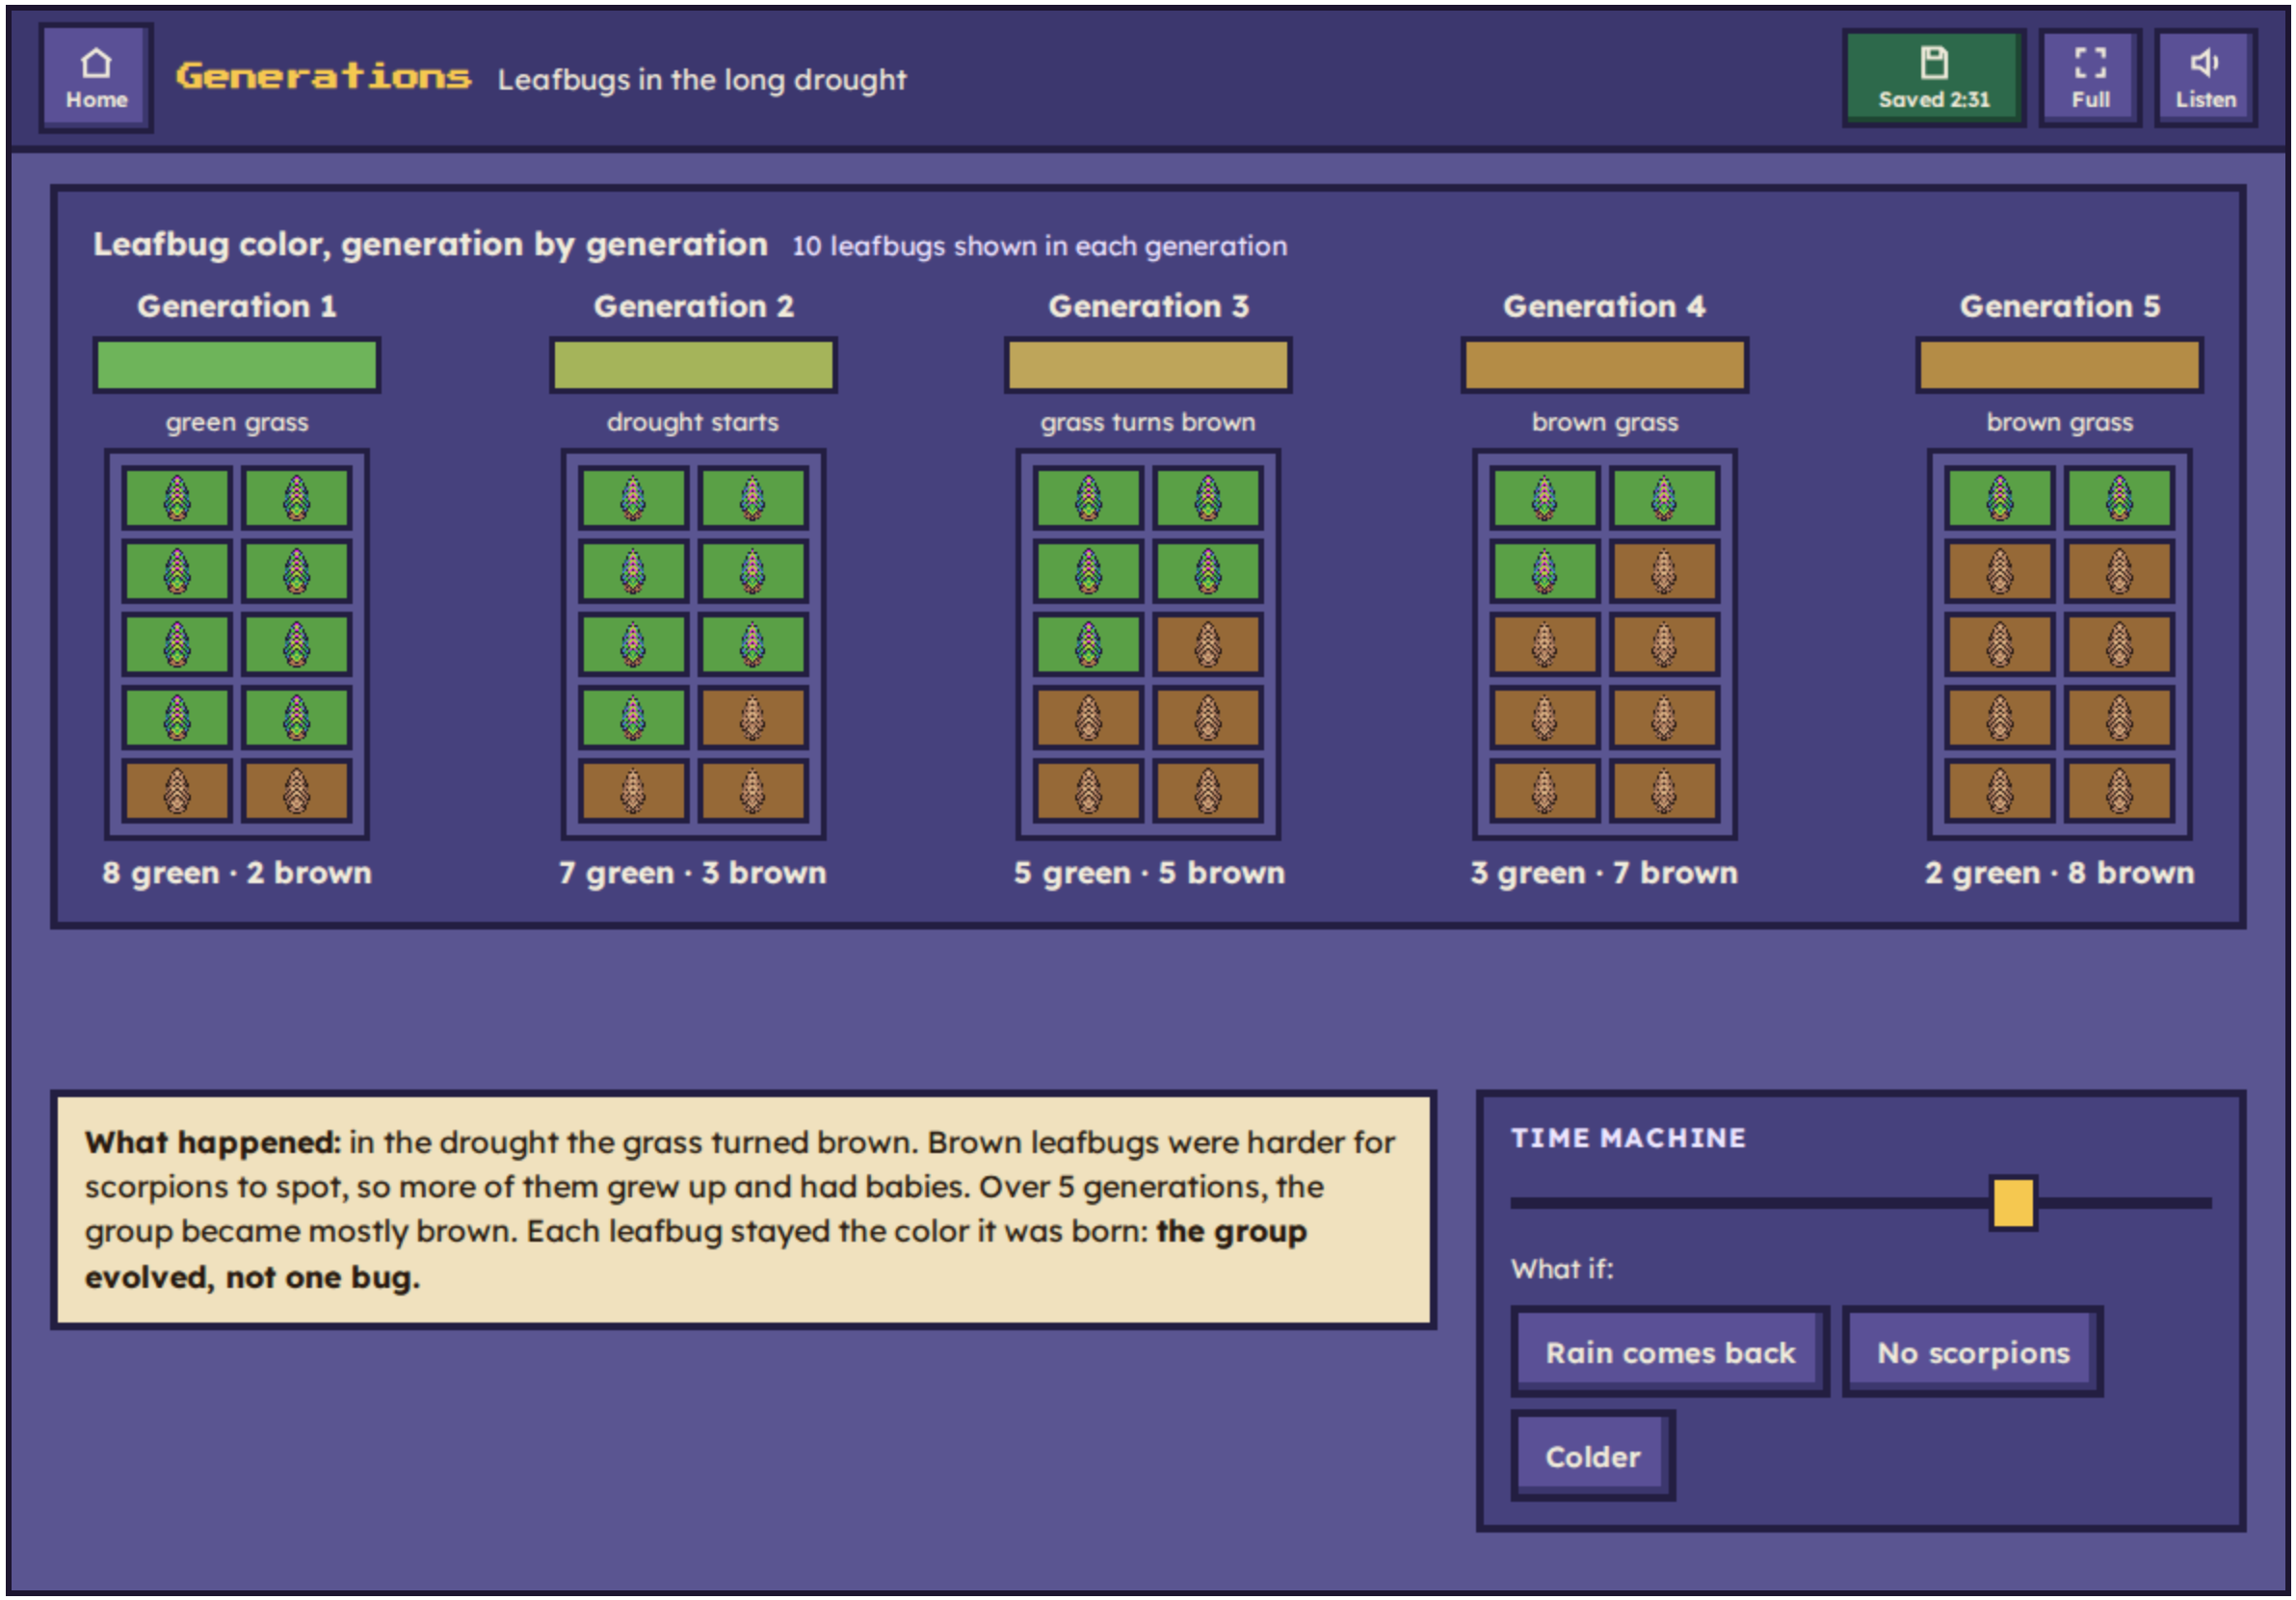

12. Be the creature

Play as any creature: joystick or tap to move, Catch, Hide and Rest, food and water bars, a short goal and timer. Prey poofs back to its burrow.

13. Generations (evolution, accurately)

The group changes over generations, not one bug. Time Machine and What if experiments.

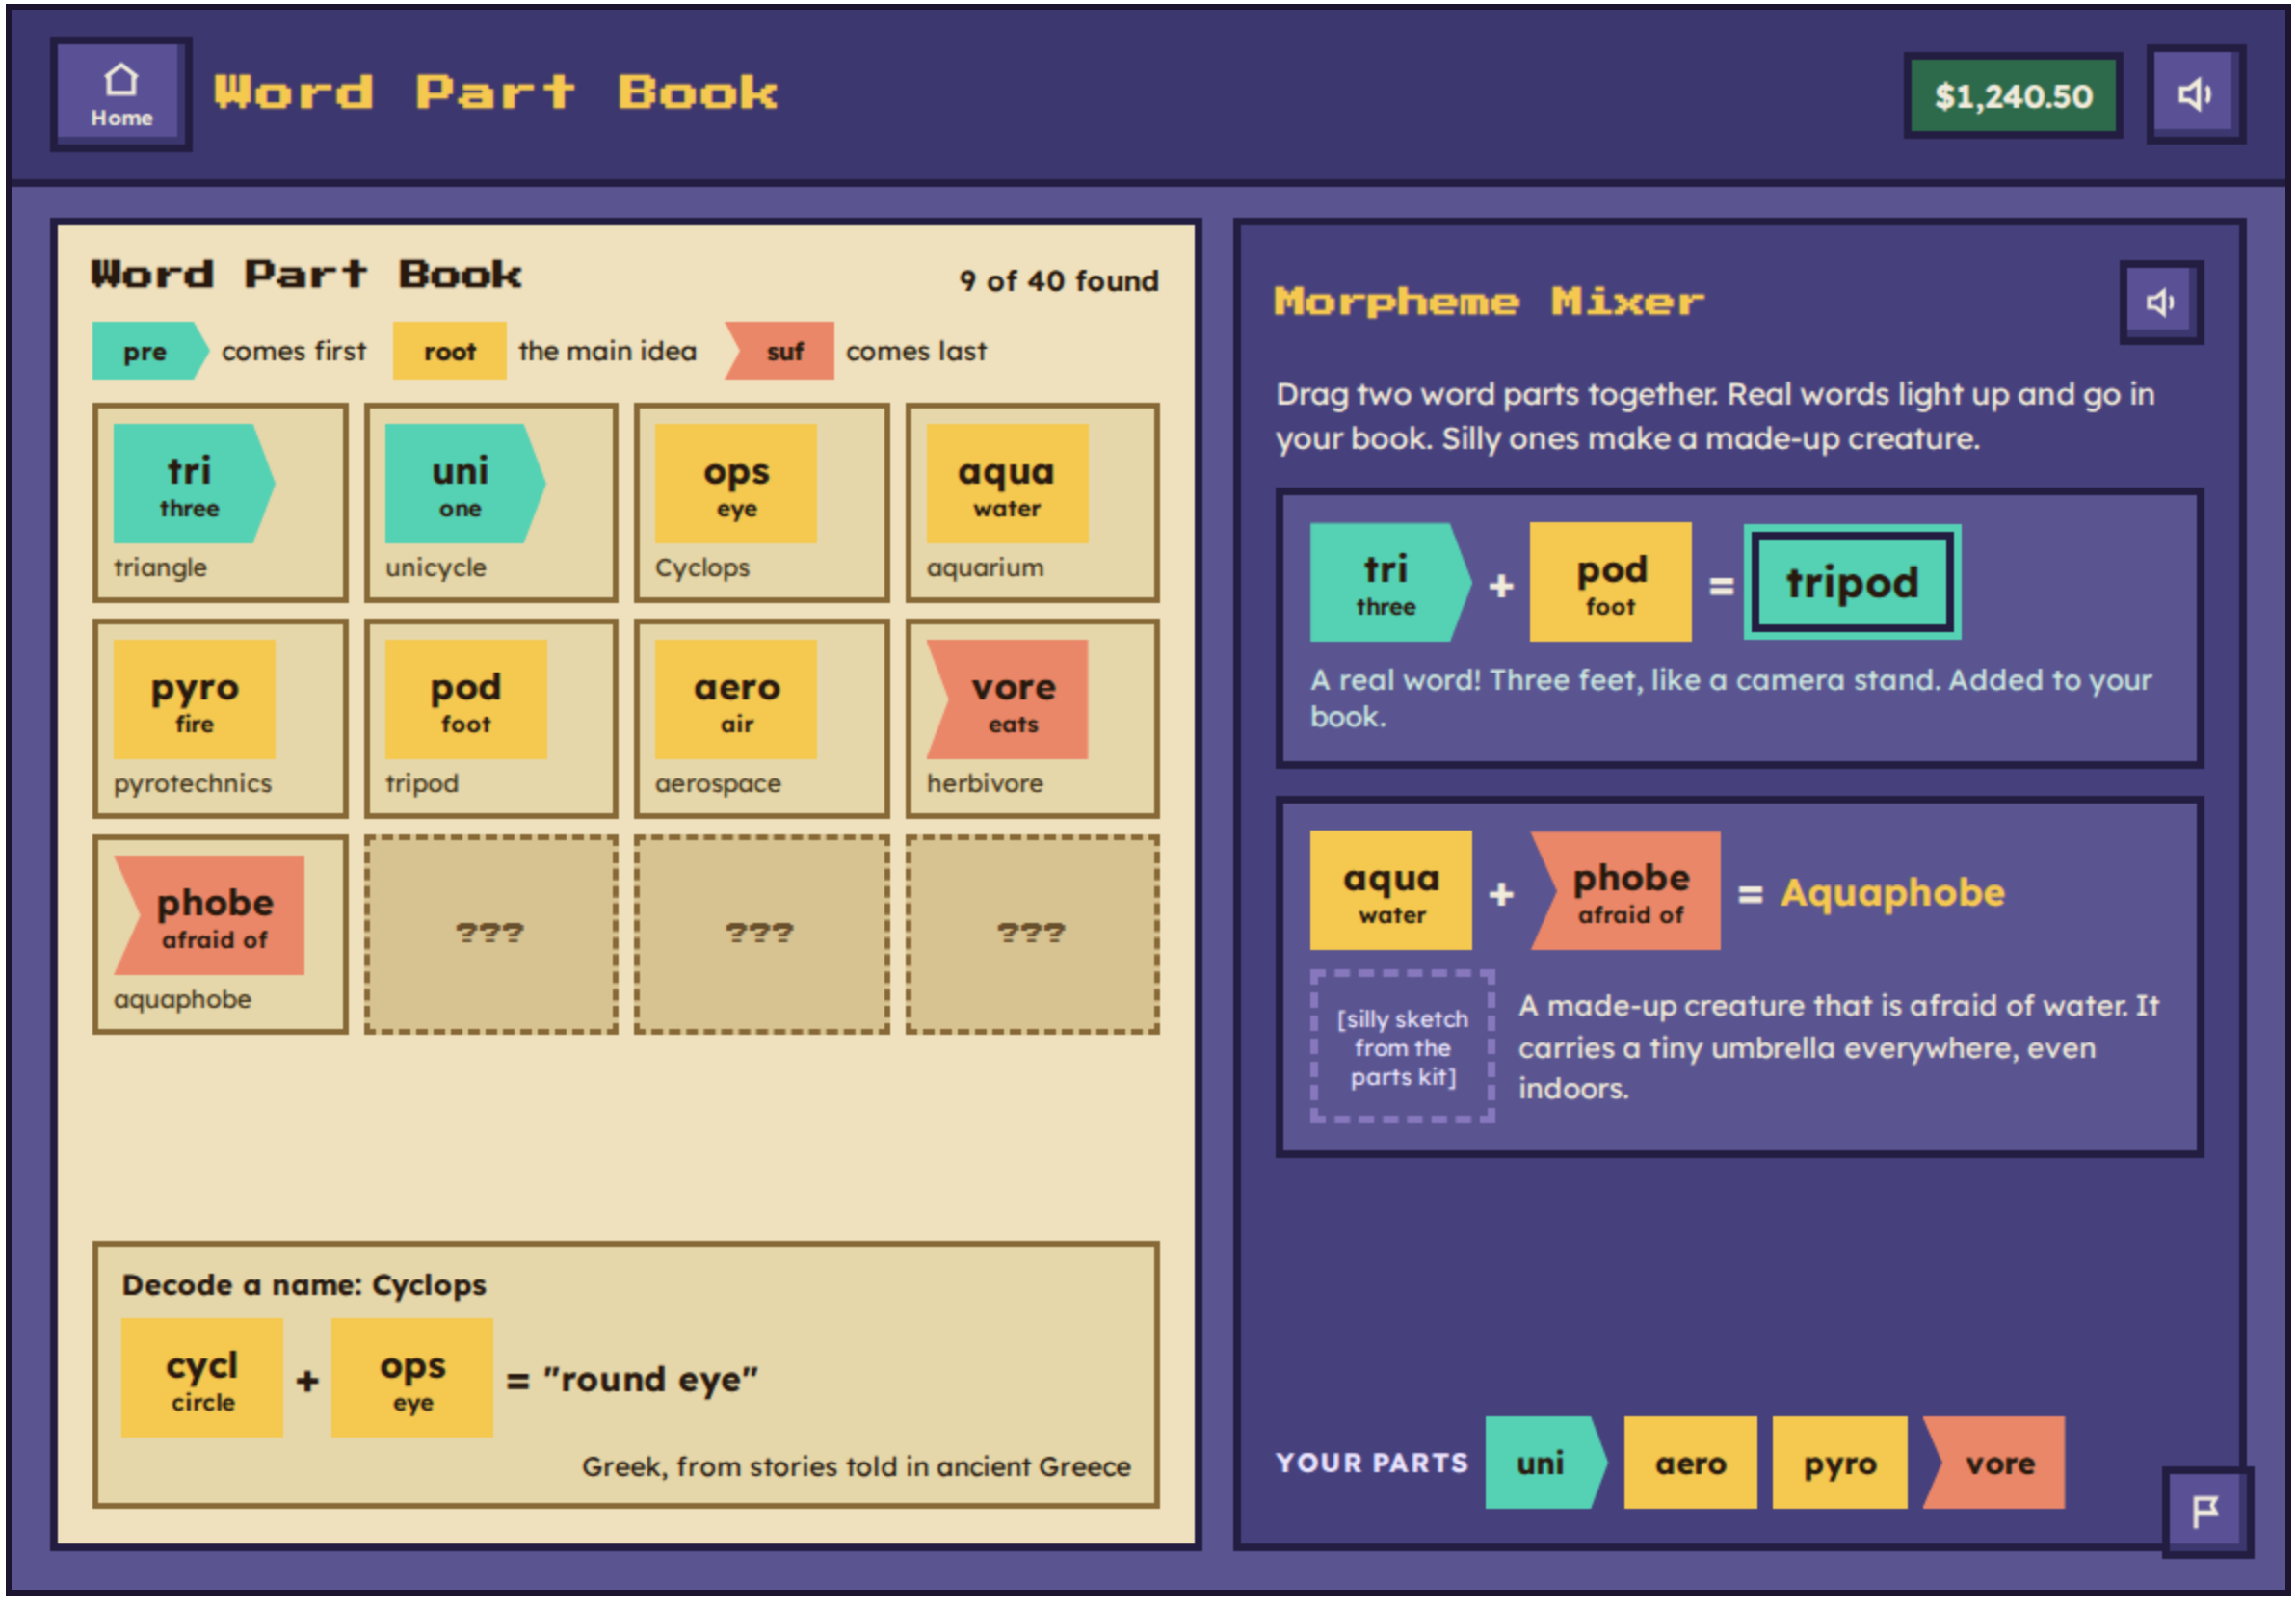

5. Cauldron and wand

Read the recipe and follow the steps in order (the bowl goes first), add ingredients, then write the spell word with the wand.

6. Word Part Book and Morpheme Mixer

Collected word parts, decoding real names, and mixing parts into real words or silly creatures.

7. Creature cards and wands

A private card for every found or made creature, and the wands earned by rank.
