Town Square, 50 x 50 lot

Made from the 3D models already in the Build Mode catalog (her uploads included), with the real terrain, water and sky the game uses. North is up. 1 unit is about one player tall.

What is where

- **Center:** a paved square with the dog statue, four benches facing it, four shade trees, flower beds, low hedges and a street lamp at each corner.
- **Four brick streets** run from the square to each edge of the lot (north, south, east, west), so new regions can join on any side.
- **North row (shops facing the square):** Bakery, Post Office, a columned bank, a corner shop with a sign.
- **West street:** a market of four stalls (red, green, plain) with barrels, crates and an egg basket.
- **East street:** the Seamstress shop and the Cinema.
- **South-west park:** gazebo, slide, swings, carousel, two picnic tables, an info board, dirt paths, a dog and a cat.
- **South-east pond** (dug with the Terrain tool): fishing dock, rowboat on the water, ducks, ferns and tropical plants around the edge, anchor and bait box, a bench facing the water.
- **Edges:** pines and round trees all the way around, so the lot reads as a town in the woods.

Everything here can be built today with Build Mode: placing, the Terrain tool for the pond, the ground brush for paths, and the new 🌿 Plants brush for the edge trees and pond plants.

Town Square, views

Top left: from above the pond, looking north over the square.

Top right: what a student sees walking up the south street toward the statue.

Bottom left: from above the market street, looking east.

Fantasy forest, 30 x 30 lot

A heavily forested region: about 70 trees and 230 plants, a stream, a path, and a hidden alchemist's clearing. North is up.

What is where

- **The path** winds in from the south edge, over a wooden bridge across the stream, through the clearing and out to a cabin in the north-east.
- **The stream** (dug with the Water brush) crosses the whole lot from west to east, with stones and reeds along its banks.
- **The alchemist's clearing** (north-west of the bridge): a bubbling cauldron with the Blob Wizard, a glowing brazier, an alchemy bench with potions, a bookcase, an armillary sphere and an armor stand.
- **The great tree** behind the clearing, with an arched door at its roots.
- **Glowing crystal clusters** (purple and blue) tucked into the woods.
- **A fairy ring** of mushrooms in the south-east with the Mushroom King in the middle, giant red toadstools nearby, a bunny and a Mushnub.
- **Lantern posts** light the path; a deer drinks at the stream and a fox waits in the west woods.
- **The forest:** strange trees, hand-painted pines, huge trees and big tropical plants over ferns, bushes, flowers, weeds and rocks.

The trees and undergrowth are the kind of fill the new 🌿 Plants brush paints in a few strokes (Pine forest, Leafy trees, Ferns, Bushes, Flowers, Mushrooms, Rocks).

Fantasy forest, views

Top: from above the south-east corner, looking over the canopy to the great tree. **Bottom:** standing on the path just past the bridge, looking into the alchemist's clearing.
