# Pets and Animals

Every pet in the game and every other animal in the Build Mode catalog (people, Neighbors, monsters and other characters left out). Note: pets are paused right now (everything was refunded on 2026-10-06 until Pets v2), so the Pet Shelter is closed; this is the list that comes back. Any catalog item you removed with right-click is still listed here.

⚠️ **Found while making this list:** pictures marked "no colors" are drawn plain white in the game too. Their color files never made it into the project when the packs were added (the Kenney Cube Pets colors, and the color sheet for the Blob creatures). Re-uploading those two packs (Kenney "Cube Pets" and Quaternius "Ultimate Monsters") brings their colors back.

## Pets (38 adoptable animals, plus 6 fun buddies held back)

Rarity sets how often a pet comes out of the Mystery Adoption Box. Size is how big it walks beside the student. Every pet is also placeable in Build Mode.

## Other animals in the Build Mode catalog (66)

Not pets: decoration that comes alive. Animals with a walk animation wander, fish swim in dug water (they can only be placed in water), and the rest play their idle animation.
