Shared in every new game

- Your gameplay assignments count: "any game" assignments, and each game can be picked as the "specific game".
- Your rounds rule: a gear button for questions each time (1 to 5) and rounds where a game has them, locked for assignments.
- A personal "My best" board (not Pet Show Ring, which you said has no rankings).
- "Leave this game?" before leaving.
- Quiet sound effects with an on/off button, and the student's own Reduce motion setting.
- Progress shows on the Game Dashboard cards. Build Mode marks game roles that are not in the town yet.

Waiting on you

- **Construction Site:** should a finished building appear in Town Square, and how?
- **Cupcake Tycoon:** should shop coins ever turn into real money or prizes? (Built as no.)
- **Tappy Plane:** your "go".
- Still open from earlier: quest-only pets, fur colors, the Torbie and Black Lab models.

To put them in the town

- In Build Mode, give a building one of the roles above. Until then every game is in the computer's game picker.
