Supernature: art still wanted

For Miss Kayden · October 20, 2026 · Build Queue 275 · Supernature works today with what is already in the game. Everything below makes it better; nothing here blocks students.

How to send art: drop the files (or a zip) into this chat. Pixel art, PNG with a see-through background, one style. 32 x 32 or 48 x 48 pixels per sprite is ideal, any size works. Sprite sheets are fine. No blood, wounds, skulls or bones (her rule); anything like that is left out.

1. Most wanted (students will notice right away)

What	Why	Details
Creature move loops for the 52 creatures	Each creature is one still picture now, so it slides around the Habitat instead of walking, swimming or flying.	Idle loop and move loop, 2 to 4 frames each. Start with the favorites: Griffin, Kappa, Sphinx, Jackalope, Curupira, Bunyip, Selkie, Umibozu, Mermaid, Kraken.
Land animals for food webs	Predators need prey the students know: rabbit, deer, mouse, frog, songbird, owl, fox, snake, worm.	Walk and idle frames, left and right at least (Be the creature uses them too).
Biome tiles	Desert, tundra, ocean floor, sky islands and cave look plain next to swamp, grassland and forest.	Desert (sand, cactus), tundra (snow, ice), ocean floor (coral, kelp, seaweed), sky islands (clouds), cave.

2. Nice to have

What	Details
Disaster and weather effects	Wind lines, flood water rising, dry cracked ground, smoke and ash, lava glow, lightning, plus "after" tiles (burned ground, new sprouts, moss on bare rock). Rain, snow, fog and leaves are already in.
Shelter props	A burrow, a nest, a log, a cave mouth, a small bridge (creatures prepare before a disaster).
Beast on a sewing dummy	The Bestiary object in the Witch's House.
A modular creature parts kit	Bodies (walker, flier, swimmer, slitherer, floater), heads, eyes, arms, tails and wings on one shared grid, for more Creature Maker parts. Search "modular pixel monster creator".
Cauldron and Shop extras	A stirring spoon; ingredient icons: dew drop, feather, moonlight jar, salt; silly items (toad burp, pixie dust, troll toenail, dragon sneeze); rare items (phoenix ember, kraken ink, unicorn sparkle, star sap, thunder in a jar).

Sound effects	Page turn, card flip, quill scratch, wand sparkle, cauldron bubble loop, plop, stir swish, cork pop, smoke poof, globe whoosh, creature calls (chirp, croak, rumble, buzz), footsteps, wing flaps, splash, rain, wind, fire crackle, coin clink. Your Witchy UI sounds already cover the buttons.

3. Not needed any more

- closed **Music:** no music in Supernature for now (your answer 2, October 20).
- covered Host wizards, books, wands, cauldron, spices, mushrooms, plants, materials, UI kit, energy faces, world map, bugs and sea life, pixel smoke and sparkles, the 52 creature pictures, and the Witch's House.
